

# BS EN P16S Chip size

## Mass fraction i.e. Amount by weight

Fines

Max 15%  
<3.15mm

Main

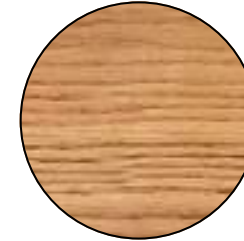

Minimum 60%  
3.15– 16mm

Coarse

Max 6%  
>31.5mm

Extreme

Max all  
<45mm

The cross sectional area of oversized particles <math><2\text{cm}^2</math>

Note: Visually fines may appear more than they are so weighing of fractions is essential  
In all fractions on sieving there will be an element of pencilling however the extreme as above stands as extreme .
